nef protein - Human immunodeficiency virus type 1, HIV-1

C;Species: Human immunodeficiency virus type 1, HIV-1

C;Species: Human immunodeficiency virus type 1, HIV-1

C;Species: Human immunodeficiency virus type 1, HIV-1

C;Accession: JC5400

C;Accession: JC5400

C;Accession: JC5400

R;Macreadie, T.G:; Lowe, M.G.; Curtain, C.C.; Hewish, D.; Azad, A.A.

Biochem: Biophys: Res. Commun. 232, 707-711, 1997 HIV-1 Nef N-terminal peptides to ye A;Title: Cytotoxicity resulting from addition of HIV-1 Nef N-terminal peptides to ye A;Recission: JC5400; MUID:97271389

A;Recission: JC5400

A;Molecule type: protein

A;Residues: 1-206 <AAC>

C;Comment: The amino-terminal part possesses membrane-perturbing and fusogenic activents.

C;Superfamily: AIDS nef protein

F;2-206/Product: nef protein #status predicted <AAT>

nef protein (clone C15) - human immunodeficiency virus type 1 (fragment)
N.Alternate names: 3'-orf protein
C.Specides: human immunodeficiency virus type 1, HIV-1
C.Specides: human immunodeficiency virus type 1, HIV-1
C.Specides: b. Josephs, virus type 1, HIV-1
C.Specides: b. Josephs, S.F.; Hahn, B.H.; Reddy, E.P.; Livak, K.J.; Pett R.Ratner, L.; Starcich, B.; Josephs, S.F.; Hahn, B.H.; Reddy, E.P.; Livak, K.J.; Pett Nucleic Acids Res. 13, 8219-8229, 1985
A.Title: Polymorphism of the 3' open reading frame of the virus associated with the a A.Reference number: S03244; MUID:86067228
A.Molecule type: mRNA
A.Molecule: 1-182 - KRAT>
A.Residues: 1-182 - KRAT>

N:Alternate names: 3'-orf protein; orfF protein
C;Species: human immunodeficiency virus Zr-6
C;Date: 30-Sep-1987 #sequence_revision 30-Sep-1987 #text_change 16-Jul-1999
C;Accession: F26192
C;Accession: F26192
C;Accession: F26192
A;Title: Molecular characterization of human immunodeficiency virus from Zaire: nucleotin
A;Reference number: A26192; MUID:87248097
A;Accession: F26192
A;Molecule type: DNA
A;Residues: 1-212 <SRI>A;Reference C; GB:K03458; GB:M16322; NID:9329398; PIDN:AAA45381.1; PID:9329404
                                                                                                                                                                                                                                                                                                                                nef protein (clone HAT3) - human immunodeficiency virus type 1

N.Alternate names: 3'-orf protein

N.Alternate names: 3'-orf protein

S.Species: human immunodeficiency virus type 1, HIV-1

C.Species: 13-874

C.Species: N.S.Species: N.S.Species: N.S.Species: N.S.Species: N.S.Species: N.S.Species: N.S.Species: N.S.Species: N.Species: N.Speci
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ä
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         229
